

# JOHN ODYSSEUS LIM

ASPIRING AI/ML ENGINEER | COMPUTER ENGINEERING STUDENT |  
PASSIONATE ABOUT DATA SCIENCE & MACHINE LEARNING

## CONTACT

- +639155964194
- jhndysslm@protonmail.com
- linkedin.com/in/jhndysslm/
- github.com/Odysseus-droid

## SKILLS

- Python
- Google Colab
- Github
- Critical Thinking
- Logical and Process-oriented thinking
- Eagerness to learn new technologies

## LANGUAGES

- English (Fluent)

## PROFILE

Hi! I am John Odysseus Lim. I'm currently studying Computer Engineering in the Data Science Track at the Technological Institute of the Philippines. I'm looking for an internship or part-time opportunity that would give me experience in the field of Data Science or Artificial Intelligence.

## PROJECTS

### Analysis and Prediction of Malaria Trends Using Supervised and Unsupervised Learning

DECEMBER 2024

- Used supervised learning to predict malaria case counts based on historical data.
- Used unsupervised learning to cluster regions based on trends, identifying patterns like high-risk areas and seasonal peaks.
- Provided actionable insights for targeted public health interventions.

## EDUCATION

### Bachelor of Science in Computer Engineering

Technological Institute of the Philippines Manila

2022-2026
